

Mikael Reuterswärd
Mount Everest Climber

"Before, my tap water tasted like metal and fairly stale. I tried the water processor and after only a couple of days, the water was fresh without metal taste, it tastes really good. How it works, I don't know - only that it works...."

VWP100
For apartments, kitchens or bathrooms.

VWP200
For households < 200m² (2150 ft²)

VWP300
For estates > 400m² (4300 ft²)

AQUASOUND
For private pools, basins, ponds, fountains, water tanks.

US Patent No: US D424,157

HOW DO I INSTALL IT?

The VWP Water Processor is easy to install. It is simply attached around the incoming cold water pipe using only one screw. No cutting of pipe or use of plumber is necessary. For optimum results match correct size processor with size of home or business. Also combine a VWP200 on the main intake and a VWP100 on the kitchen/bathroom for maximum results.

HOW DOES IT WORK?

The VWP Water Processor ionizes the water using a special frequency resonance technology. This technology releases electrons from the water molecules which oxygenates the water, oxidizing impurities such as iron and copper; converting them into small harmless crystals. The lime in the water will also be crystallized, eliminating scaling and deposits. The water will become "soft" without removing the vital minerals. If chlorine is present in the water, it will be reduced to a harmless level.

REFERENCES RESIDENTIAL

HOUSEHOLDS - VILLA GALV, TOMARP

17th century villa with well water.

Installation: 1998

Problem: Brown colored and bad smelling water

Cause: High levels of iron

Solution: Numerous VWP200s on entire water installation.

Benefits: Elimination of discoloration and odor.

ESTATES - UNIVERSITY OF KRISTIANSTAD

College of higher learning in Kristianstad, Sweden. (200 000 m²)

Installation: 2001

Problem: Hard Water

Cause: High level of minerals

Solution: Two VWP300s were installed in the sub centrals in each house.

Benefits: Effects of soft water

www.hkr.se

HOTELS - FIRST HOTEL CHRISTIAN IV

Famous historic hotel named after Danish King. (86 rooms)

Installation: 2005

Problem: High heating costs

Cause: Boiler scaling

Solution: Installation of five VWP300s from Heat Exchanger, four VWP300s on third floor and four VWP300s on 4th floor.

Benefits: Removal and prevention of 99% of boiler scaling

AWARDS EUREKA - BRUSSELS

The VWP Technology won a Silver Medal at the Eureka International Innovation Contest in 1998. The renowned international Eureka contest brings together delegations from more than 25 countries to present their patented inventions and new ideas and is first and foremost a propitious place for professional exchanges with energy being the star player.

Residential & Consumer

FRESH WATER

- PREVENTS LIME SCALING
- REMOVES CALCIUM DEPOSITS
- CREATES SOFT & SILKY WATER
- ELIMINATES BAD TASTE & ODOR
- MINIMIZES CHEMICALS
- OXYGENATES WATER
- REDUCES BACTERIA

VWP WATER PROCESSOR
ENVIRONMENTALLY-FRIENDLY
& REDUCES ENERGY COSTS
- NO WASTE OR MAINTENANCE

NATURAL WATER

VWP200
VWP100

Use a VWP200 to service an entire household and also attach a VWP100 to your kitchen sink or bathroom for maximum results.

SOFT WATER

Residential & Consumer

VWP WATER PROCESSOR

Our household water is used regularly for drinking, cooking, cleaning, showering and watering our plants, so in essence the quality of our water has a big impact on our lives. This water is not free from impurities which cannot only affect our quality of living but actually negatively impact our bodies.

Our scientists from Sweden, have developed a new environmentally-friendly water processing system which uses a frequency resonance technology. This technology, in addition to eliminating common hard water problems (calcium oxide, iron, copper, nitrate, nitrite, and manganese), eliminates scaling, minimizes chemicals (chlorine, etc.), reduces bacteria and produces an oxygenated "living" water. This "living" water becomes self cleaning and also retains healthy minerals and elements which is an exceptional source of nutrition for humans, pets, plants and fish.

WHAT ABOUT SALT CONDITIONERS ?

It has been recently discovered that salt based systems pollute the fresh ground water supply during the back-washing or regeneration process. This has caused many communities in the USA (primarily California) to ban salt-based or automatic water softeners. In addition, they are very expensive and require extensive maintenance.

The VWP Water Processor is environmentally-friendly and recycles back into nature in a cleaner form. The system does not require professional installation, electricity, salt or maintenance.

WHY USE A FILTER ?

Filters must be changed often to reduce the risk of bacteria growth and microorganisms. If not changed regularly, you may be consuming water that has a lower quality than before the filtration. Changing filters involves a continuing cost for replacement filters.

The VWP Water Processor has no replacement parts, requires no maintenance (no running costs) and generates no waste products. The system is also easy to install.

PURE WATER WITH REVERSE OSMOSIS ?

Reverse Osmosis creates ultra-clean water. Unfortunately, this ultra-clean water is also missing minerals and useful trace elements normally found in healthy living water. Essentially, the final product is a sterile water. They also need expensive membranes replaced on a regular basis.

The VWP Water Processor creates a self-cleaning water that still retains essential minerals and elements which are nutritionally healthier for humans, animals, fish and plants. The water processor also does not require professional installation, maintenance, electricity or additives.

HEARD OF ELECTROMAGNETIC SOFTENERS ?

Electrical devices require power, which have running costs. Their operation will be affected if the power is interrupted. They are also only primarily effective with calcium related problems.

The VWP Water Processor is more effective for lime scale removal and also reduces bacteria and oxygenates the water. In addition, it does not require power and has no running costs or maintenance.

EASY TO INSTALL
No need to cut pipes, replace parts or maintenance.

ENVIRONMENTALLY-FRIENDLY

No more bottled water! The VWP Water Processor and patented design, does not use any power, chemicals or additives and there are no replacement parts or waste. Your pets and plants will benefit from the oxygenated water and all drainage water that has passed through the processor will be sent into nature in a cleaner form. In addition, your output and water usage will be greatly reduced.

Install it yourself, without the cost of a plumber! In a short time, your water will become soft and silky, taste and smell better and your skin will not feel dried out after a bath or shower; less need for body lotions and creams. Also when a household has soft water, you will only need to use half the amount of washing detergent and other cleaning products. Your clothes will become softer, pets and plants healthier and you will be saving energy costs.

- PREVENTS LIME SCALING
- REMOVES CALCIUM DEPOSITS
- CREATES SOFT & SILKY WATER
- MINIMIZES CHEMICALS

- NO CHEMICALS OR MAINTENANCE
- ELIMINATES BAD TASTE & ODOR
- REDUCES BACTERIA
- OXYGENATES WATER

SOFTER SKIN & HEALTHIER LOOKING HAIR

When water is softened, shampoo and conditioners lather more and work better. This creates softer hair and skin which feels less oily and without residue and no need for skin lotions.

HEALTHIER LAWNS & PLANTS

The intensified oxygenation and smaller softer forms of calcium help to increase plants intake of nutrients. This gives plants larger, healthier root systems which augments their ability to withstand virus attacks.

SOFTER BRIGHTER CLOTHES

No more stains on clothes from iron and other metals. Clothes also become softer when hard calcium is eliminated.

LOWER ENERGY COSTS

Reduces scaling in boilers by 99%. This lowers energy costs because scale build-up has an insulating effect that reduces the elements ability to heat up water. Cleaner pipes and heaters will result in better performance and become more efficient.

USE LESS DETERGENT

For every grain of water hardness, 2-4% more detergent is used. Soft water can give a 50% savings of detergents and chemicals.

EASY INSTALLATION

It can easily be installed yourself without a plumber. No need to cut pipes, just clamp on pipe and tighten one screw!

CLEANER DISHES

The calcium oxide is crystallized leaving dishes cleaner with less spotting.

NO RUNNING COSTS

The VWP Water Processor does not require power, chemicals or additives, filters or maintenance and has no moving parts.

BETTER TASTING & SMELLING WATER

The oxidation process reduces impurities and eliminates odor and bad taste from water resulting in better drinking water.
